# Getting Started with ZStack-CC2530

Congratulations on your installation of Z-Stack™ for the SmartRF05 and CC2530EM development platform.

This combination of state-of-the-art hardware and software from Texas Instruments are all that you need to put you on the fast track to adding ZigBee power to your product.

From your Windows *start* menu, you can access the Z-Stack documentation. Refer to the *Z-Stack User's Guide* for details on setting up and running the Z-Stack Demo application. You should also read the **README** document for a summary of new features and any errata.

To get started, visit www.ti.com/z-stack for everything you need, including the IAR EW8051 Embedded Workbench for the CC2530, development kits, application notes, datasheets, support tools, user guides, and more.
